

CASE STUDY

**European Sports E-Commerce
Provider Streamlines New Systems
Integrations with MuleSoft
Anypoint**

softserve

Client Background

Our client is continental Europe's leading sports e-commerce platform, operating in the fast-growing categories of bike, tennis, outdoor, team sports and athleisure.

Business Challenge

Our client has acquired several online sporting goods retailers. In addition to the increased number of internal systems, our client was starting new sales channels and needed a partner who was able to build integration foundation and replace legacy point-to-point integrations.

Our client needed a partner with experience in building future-proof integration solutions. They selected SoftServe to lead the implementation of a MuleSoft platform and perform analysis, architecture, development, and advise on other integrations. The challenge our client faced stemmed from its organization. Integrating several systems required collaboration with all SMEs and stakeholders represented by various vendors.

Project Description

SoftServe implemented a solution using MuleSoft's Anypoint Platform by building integration applications on top of it. Our client launched a new e-shop with a new engine and needed to have actual inventory, prices, and order status to be fed into it. SAP with the legacy file interface was the only available option to source the data. SoftServe implemented an integration with real-time capabilities and a future-proof foundation for modernization.

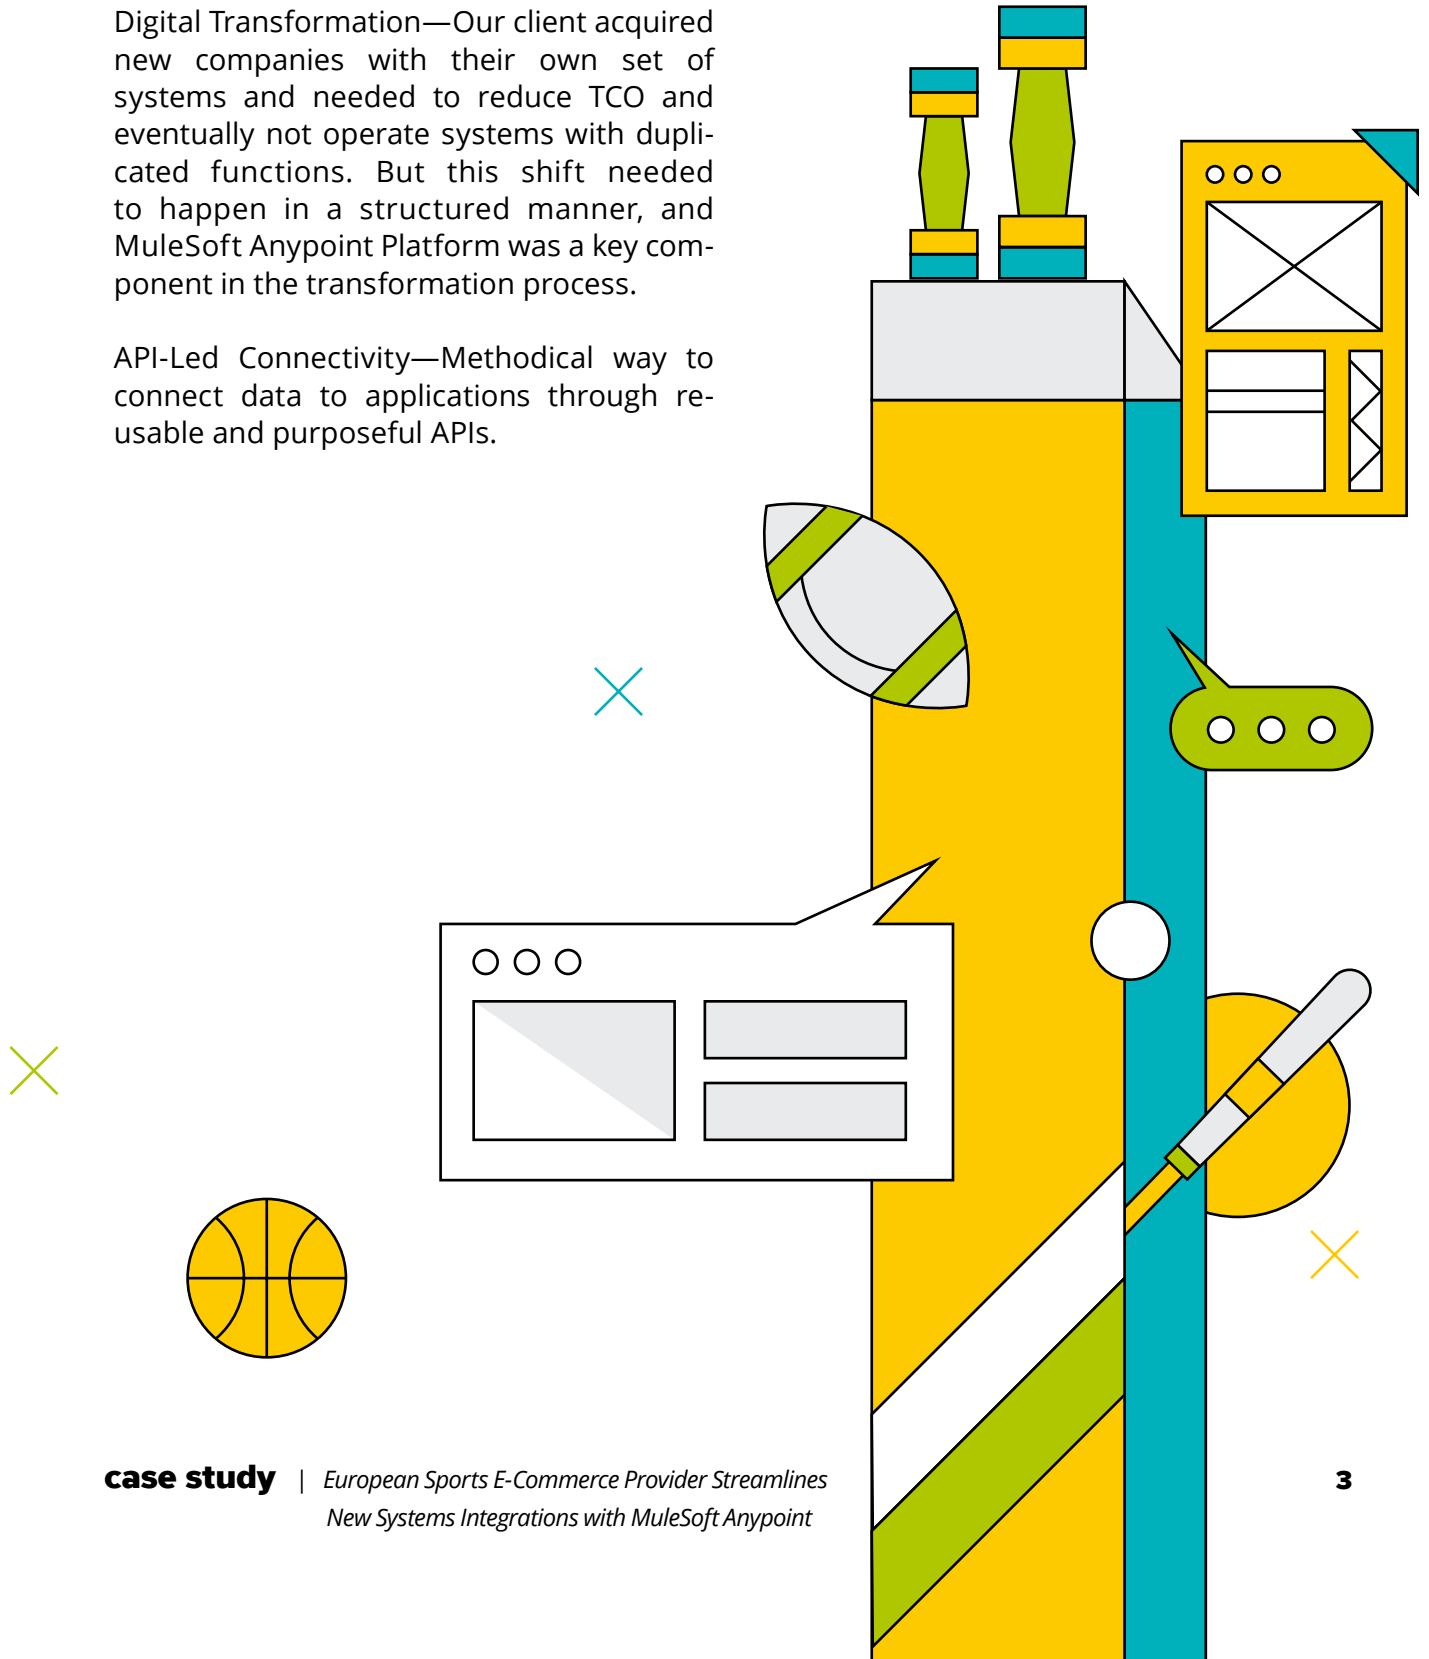

Value Delivered

Reduced IT Delivery Gap—Unlocked the value of legacy systems with reusable and governed assets—APIs, integration templates, etc.

Digital Transformation—Our client acquired new companies with their own set of systems and needed to reduce TCO and eventually not operate systems with duplicated functions. But this shift needed to happen in a structured manner, and MuleSoft Anypoint Platform was a key component in the transformation process.

API-Led Connectivity—Methodical way to connect data to applications through reusable and purposeful APIs.

ABOUT US

SoftServe is a digital authority that advises and provides at the cutting-edge of technology. We reveal, transform, accelerate, and optimize the way enterprises and software companies do business. With expertise across healthcare, retail, energy, financial services, and more, we implement end-to-end solutions to deliver the innovation, quality, and speed that our clients' users expect.

SoftServe delivers open innovation, from generating compelling new ideas, to developing and implementing transformational products and services.

Our work and client experience is built on a foundation of empathetic, human-focused experience design that ensures continuity from concept to release.

We empower enterprises and software companies to (re)identify differentiation, accelerate solution development, and vigorously compete in today's digital economy. No matter where you are in your journey.
