

ACCELERATE ENTERPRISE PRODUCTIVITY WITH AI-POWERED SEARCH AND ASSISTANCE

SOFTSERVE'S GOOGLE AGENTSPACE ACCELERATOR

89% of employees waste time searching across six or more systems daily. Siloed data, compliance risks, and generic AI tools slow productivity and create inefficiencies. Google Agentspace solves these challenges with enterprise-grade search, summarization, and AI-powered actions grounded in your organization's data.

WHAT IS AGENTSPACE

Google Agentspace unifies enterprise data with AI-driven search, summarization, and workflow automation powered by agentic AI. Its multimodal interface supports text, image, and voice inputs, allowing employees to quickly find insights, complete tasks, and generate content across business applications while maintaining strict access controls.

KEY FEATURES

-  Google-quality unified search
-  AI agents automate workflows
-  Compliance-ready security
-  Context-aware answers
-  Pre-built connectors
-  Granular Access Control

USE CASE EXAMPLES

Sales Assistant	Instant access to customer insights and product details.
HR Policy Self-Service	Quick answers to HR policies and benefits.
IT Support Automation	AI-powered troubleshooting and ticket resolution.
Technical Documentation Search	Fast, context-aware access to technical docs.

KEY BENEFITS

-  Access 50+ enterprise systems seamlessly with enterprise security and compliance.
-  Get personalized, AI-driven assistance with context-aware search, summarization, and automation.
-  Save time by automating repetitive tasks and focusing on high-value work.
-  Improve productivity with streamlined workflows and AI-powered automation.
-  Scale securely on Google Cloud's enterprise-grade infrastructure with data privacy and regulatory compliance.
-  Future-proof operations by leveraging AI for smarter, faster decision-making.

SOFTSERVE AGENTSPACE IMPLEMENTATION ACCELERATOR

4 WEEKS

RAPID AI ASSESSMENT

- Gain a deep understanding of your enterprise knowledge workflows, key pain points, and success criteria.
- Assess data readiness, including availability, ACL alignment, and security & compliance requirements.
- Define the pilot scope and establish measurable success criteria (KPIs, ROI).

DELIVERABLES:

- Comprehensive discovery findings, including business goals, prioritized use cases, and success metrics.
- A clear proof-of-value (PoV) roadmap and defined project scope.

PROOF-OF-VALUE

- Deploy a non-production environment within your Google Cloud project, configure identity provider (IdP), and activate key connectors.
- Enable AI-driven search, summarization, and baseline generative assistant capabilities.
- Onboard up to 50 test users to assess content relevance, summarization quality, and compliance with ACLs.

DELIVERABLES:

- Configured AgentSpace environment with up to two data connectors.
- Performance evaluation of search and generative assistant capabilities.
- Actionable next-step recommendations for optimization and scale.
