HEALTH-CARE

WITH EFFICIENT DEVOPS SOLUTIONS ON AZURE

SoftServe played a crucial role in designing and developing this enterprise framework. It enables businesses to deliver secure web services to key constituents through both web and mobile portals.The portal infrastructure was built on a Microsoft Azure enabled back-end system. It's used for data access and flexibility, contributing to a 360-degree patient view.
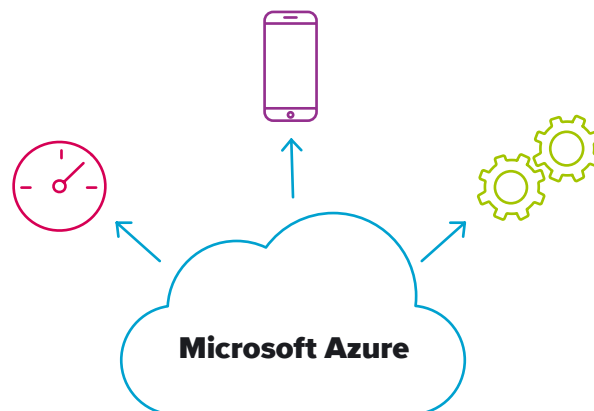

Unprecedented Scalability and Flexibility

Azure as a public cloud and IaaS solution allows the configuration of new resources in minutes without affecting normal operations.

Delivering a mobile-first experience

Easily tailor clients' front-end services without modifying back-end infrastructure. This flexibility enables greater personalization and supports the company's mobile-first strategy.

Accelerating development and innovation

Move to a continuous integration (CI) development model with ongoing deployment into production.

Microsoft Azure
